## Summary

Hi, I am Vimal Rijal, a software engineer with 2 years of experience in full-stack web development. I help businesses build digital solutions using latest Technologies. I am passionate about building scalable products that are valuable to users.

## Experience

### Full Stack Developer at MaqroCap

Sydney, Australia | Nov 2022 - present

- Designed and developed a comprehensive **stock recommendation portal**, including a user-friendly **ASX data chart** and a range of other key features.
- Utilized **Strapi** to build a content management system (CMS) and design APIs for multiple projects.
- Worked with **Refinitiv API** provider in order to access live stock data.
- Utilized best practices in web development, including **responsive design** and **search engine optimisation**, to ensure that the portal was accessible and visible to users across a range of devices and platforms.
- Collaborated with the marketing team to build a strong online presence for the portal, including a Google-optimised landing page and a marketing website.
- Deployed the Google landing Maqro website, Maqro marketing website and API built with Strapi on Vercel.
- **Stack used** - Next.js, React.js, Tailwind, Strapi, WordPress, PHP, MongoDB, REST API, Vercel, Netlify, Github.

### Frontend Developer at Cotiviti Nepal

Kathmandu, Nepal | May 2021 - Nov 2021

- Work under a team who is responsible for Building and design **data quality check software** for health insurance companies
- Produced websites compatible with **multiple browsers**.
- Followed best strategy in web development, including **multiple device accessibility** and **SEO** to ensure that the software was accessible and visible to users across a range of devices and platforms.
- Applied **Agile** scrum development methodology which enabled faster release of features and fixes.
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices..
- **Stack used** - React.js, Bootstrap, Spring Boot, Microsoft SQL Server, REST API, Bamboo version control.

## Side Projects
